PROFESSIONAL SUMMARY

DevOps Engineer with 10+ years of experience delivering cloud-native infrastructure on AWS and Azure. Specialized in Kubernetes, CI/CD automation (GitLab CI, Jenkins), and infrastructure as code with Terraform and Ansible. Known for cutting deployment times, reducing downtime, and driving DevSecOps adoption across cross-functional teams.

WORK EXPERIENCE

Senior DevOps Engineer | [Creative Way](#)

Apr 2025 – Present

- Architect and maintain **CI/CD** pipelines using GitLab CI, **automating** build, test, and deployment workflows across development, staging, and production environments — reducing manual deployment effort by ~70%.
- Manage Docker containerization and **Kubernetes** orchestration for production **microservices**; standardize application deployments using **Helm** charts and enforce RBAC and network policies.
- Automate infrastructure provisioning via **Terraform** and **Ansible** (infrastructure as code / IaC), ensuring full environment parity across all deployment tiers.
- Implement **observability** stack with Prometheus and Grafana; establish **alerting** rules and **dashboards** that reduced mean time to resolution (MTTR) by ~40%.
- Enforce **DevSecOps** practices including vulnerability scanning, secrets management, and access control policies; perform root cause analysis on production **incidents**.

Senior DevOps Engineer | [Digified](#)

Jan 2024 – Mar 2025

- **Architected** multi-node Kubernetes clusters (**high availability**) for container orchestration of microservices, improving deployment **reliability** and supporting horizontal **scaling**.
- Built and optimized CI/CD pipelines with automated testing, **zero-downtime** deployments, and **rollback** capabilities — cutting release cycle time by 35%.
- **Deployed** full observability stack (Prometheus, Grafana, alerting) across all services, achieving **99.9% uptime SLA compliance**.
- Enforced DevSecOps best practices: RBAC policies, secrets management, network policies, and security scanning integrated into CI/CD pipelines.
- Produced and maintained comprehensive infrastructure **documentation**, runbooks, and post-incident reports for knowledge transfer and **SRE readiness**.

Senior IT Consultant | [Grafene Consulting](#)

Nov 2021 – Jun 2023

- Led implementation, customization, upgrades, and **data migration** for **TeamMate+** solutions, aligning technical deployments and **reporting** with client business requirements.
- Provided end-user and technical support by **troubleshooting** issues, **coordinating** with global support teams, and ensuring smooth day-to-day system operations.
- Built strong client **relationships** through regular communication, solution updates, and contributions to technical proposals and client presentations.

DevOps Engineer & L2 Application Support | [Orange Business Services](#) Oct 2019 – Oct 2021

- Maintained 99%+ uptime SLA across 4 **critical applications**; resolved 25+ tickets daily with 90%+ first-contact resolution rate.
- Led **Go-to-Cloud** migration from monolithic architecture to containerized microservices — managed Kubernetes deployment and cloud infrastructure provisioning.
- Built Prometheus and Grafana **monitoring stack**, enabling proactive incident detection and reducing unplanned downtime by 45%.

Senior System Administrator | [Zewail City of Science & Technology](#) May 2018 – Oct 2019

- Administered Linux-based servers for PowerCampus ERP, Moodle LMS, and learning technology services; managed system performance, backups, and patching.
- Implemented ticketing system that reduced issue resolution wait time by 60% and overall resolution cycle by 25%.

System Administrator | [Active Digital Development](#) May 2016 – May 2018

- Managed Linux production, testing, and database servers; administered SVN source control, disaster recovery plans, and daily deployment operations.
- Resolved infrastructure bottlenecks and optimized resource utilization, improving overall system performance by 35%.

TECHNICAL SKILLS

Container Orchestration: Kubernetes (multi-node HA, Helm, RBAC, network policies), Docker

Infrastructure as Code (IaC): Terraform, Ansible, CloudFormation

CI/CD & DevOps: GitLab CI, Jenkins, GitHub Actions, Azure DevOps, DevSecOps

Cloud Platforms: AWS (EC2, EKS, S3, RDS, Lambda), Azure (AKS, Azure DevOps), GCP

Observability & Monitoring: Prometheus, Grafana, ELK Stack, CloudWatch

Scripting & Languages: Python, Bash, Java, C++, SQL

Databases: MySQL, PostgreSQL, MongoDB, MS SQL Server

EDUCATION

B.Sc. Computer Science — Faculty of Science, Cairo University 2015

ITI Intensive DevOps Training — AWS, GCP, Docker, Kubernetes, Terraform, CI/CD 2023
